MISS VERA FELTON

and a specially selected cast in the hilarious comedy—by Agate Loos

NOT A PICTURE, and nothing like any picture of similar title. Presented by the same great company which played "So this is London" on their last visit.

If You Liked "London" You'll LOVE This.
A Perfect Riot of Laughter-compelling Situations.
PRICES—\$1.50 and \$1.00—a few seats for Children in Balcony 50c.
Tax Extra. Seats on sale NOW at Theatricals Drug Store.

Claresholm Local News

The local hospital is filled to the limit this week.

The Elks initiated seven candidates on Wednesday night.

Born, at the local hospital, on February 28th, to Mr. and Mrs. Ivan Davis, a son.

W. C. Atkinson was on the sick list for several days with an attack of la grippe.

Mr. J. Elverum left last week for north Dakota, to attend the funeral of his sister.

The Blackbird orchestra is putting on a dance in the I. O. O. F. hall Friday night, March 4.

Mrs. L. M. Hyde, of Spokane, was in town this week visiting her daughter Mrs. Arnold Fraser.

Mrs. Ray Miller, who was very low last week in the local hospital, is reported improving.

The Catholic Women's League are holding St. Patrick's tea on Saturday, March 19, in the Masonic hall.

Reginald Denny in "Californian Straight Ahead" at the Rex theatre Friday and Saturday nights this week.

Keep in mind the Elks' tag St. Patrick's dance on March 17th. The proceeds go to the covered skating rink fund.

Mrs. Plifton was brought in to the local hospital Friday night. At the time of writing she is reported in a critical condition.

The Ladies of Claresholm I. O. O. F. No. 234 are holding a tea and sale of aprons on Saturday, March 12th, at the rest room.

Since March 1st the weather has been very mild and springlike here. The warm sunny days give one a hankering to start gardening.

The Community horse sale last Monday was a success. Animals that met the buyers' requirements brought high prices for these times.

A free-for-all bonspiel has been in progress this week locally, and has furnished a lot of sport. The ladies have participated as well as the men.

Members of the Rifle Association who wish to get instructions on the care and handling of the short Lee-Enfield rifle are requested to come to the armory on Tuesday evenings.

Coronation Review—Mrs. J. B. Rose's many friends will be pleased to hear that she has taken a decided turn for the better since Monday night when she was reported to be very low, after her operation on Tuesday last week.

The Ladies Aid of the United Lutheran church are serving tea and coffee on March 26th, at the Tea Kettle Inn, commencing at 3 o'clock. There will also be a fruit sale in connection. Will continue the tea, coffee and lunch all evening. Everybody is cordially invited.

According to the Calgary Herald, Stanley Henderson, well known in Claresholm, of Rev. Henderson, formerly located here, was injured in an auto wreck at Calgary on Tuesday evening. It appears that his car skidded on the icy street, raced up over the sidewalk and became wedged in between a telephone pole and the fence, damaging the car considerably, and Mr. Henderson suffered a dislocated shoulder when pitched against the side of the auto.

Mr. and Mrs. J. G. Dickenson entertained friends on last Friday evening in the Parish Hall, at an old time dance. The CFCA dance music, which came in live over the radio, being utilized. It was one of the jolliest social events of the season. A dainty lunch was served at 11 o'clock, after which dancing was resumed. Some of the younger set were not familiar with the old time dance, but it required only a few minutes to get into the swing, and all were having such a good time that they were sorry when CFCA signed off at 12:30.

Owing to the fact that peddlers and canvassers sometimes try to take paying the regular local license, Sgt. Tidson will appreciate it if residents will notify him when peddlers and canvassers call on them.

St. Johns Entertainment Highly Successful

The dramatic entertainment and concert given on Tuesday evening under the auspices of men of St. John's Church of England, was highly successful. The attendance was large and the entertainment of a high order. All of the musical numbers were well rendered and heartily enjoyed.

The program opened with the song, "My Sings," by Miss Kitty Gray, followed by the comic song, "I Pushed the Bassinet," by J. A. Harrison, and a violin solo by T. E. Scott.

"Fashionable Intelligence," a comedietta, in which A. Laurie took the part of Algernon Egerton, English bachelor and clubman, and Mrs. Laurie took the part of Mrs. Fitz-Adam, an American widow, was uproariously funny. Both Mr. and Mrs. Laurie portrayed the characters to perfection.

Then followed the song "Forgotten," by Mrs. J. M. Peters, comic song "Boss of the Hoose," by T. R. Evans; song "Angels Guard Thee," by A. Laurie, with violin obligate by T. E. Scott; and an amusing black face specialty by Kow Kollege Koons.

"The Burglar and the Judge," a one act comedy, was put on by J. R. Watt as Mr. Justice Gyves, A. Scott as Parkhurst his valet, and J. Bowie as Joe Searle, a burglar. All took their parts with great credit, and the comedy of the play was very appealing.

The men are to be congratulated on the very successful staging of the plays and concert.

HUTTON COAL COMPANY WILL MARKET STOCK

Offer Investing Public Block of Stock—Money for Development

(Lethbridge Herald)

Stock of the Hutton Coal Company is being placed on the market to enable the owners to put together to enable the owners to put the property on a sound financial basis. The money received will be used principally for transportation facilities between the mine and the Diamond spur, a distance of about two and a half miles.

The mine is fairly well developed at present and according to the engineer's report, there are over three million tons on the property, which, if handled carefully, should provide a nice return on invested money from now on.

"We have taken all the chances in developing the property, which is capable of shipping 100 tons a day with present equipment, and we are only placing enough stock on the market to carry out the proposed improvements," Mr. Hutton informed the Herald.

"The company is in good financial condition," he stated, "its liabilities are only three per cent of its assets. We have removed all reasonable chances of a speculative nature. We should not have much trouble in placing the shares—in fact about forty per cent has been spoken for already."

"We figure on making our money out of coal in the first shares, and as we know the business and like it, our aim will be to produce coal at the lowest cost, and the best in the field."

The company is capitalized at \$75,000, with F. H. Hutton, president; H. Becker, vice-president; E. Rosetter, secretary; and the following board of directors: F. H. Hutton, H. N. Becker, Archibald Hutton, Lorne F. Hutton, and Hazel M. F. Hutton.

Bread That Is Pure and Nourishing

We are proud of the quality and uniformity of the bread we bake and deliver to our customers. It is mixed and baked according to our own formula, and the ingredients are as pure and good as can be had. Our regular customers depend upon us entirely. We would like to expand and include you among our growing list of patrons.

ANSWERS TO LAST WEEK'S QUESTIONS

43. How Does the Storage Battery Work?
The storage battery does not store electricity, it merely accumulates it. It usually consists of an assembly of two kinds of lead plates immersed in a weak solution of sulphuric acid and filled water, (called the electrolyte). It is charged by passing an electric current through it, when the lead plates become changed in nature that a chemical action takes place between the negative plate and the electrolyte and produces an electric current, which will flow through a properly connected wire to the positive plate. The flow will continue until the plates become practically the same again, when it ceases, and the battery must be recharged.
44. How Do You Test a Storage Battery?
A hydrometer is generally used to test a battery (hydro, water meter, to measure—an instrument for determining the specific gravity, or density, of fluids). When the battery is fully charged the electrolyte has its greatest density, when its weight as compared with an equal amount of water is 1.25 to 1.3, indicated by a hydrometer reading of 1250 to 1300. As the battery discharges, the acid in the solution (which is heavier than the water) is used in the chemical action that produces the current. When the density of the electrolyte falls below 1150 the battery needs recharging.
45. Where Was Robinson Crusoe's Island?
This question has been debated almost endlessly. Alexander Selkirk, the Scotch sailor who was shipwrecked in 1659 and lived for several years on one of the Chilean islands of Juan Fernandez, doubtless suggested to Defoe the story of Robinson Crusoe. To make his story appear credible, he selected a location on the opposite side of the continent. The title of his original edition reads: "The Life and Strange Adventures of Robinson Crusoe, a Sailor Who Lived All Alone on an Uninhabited Island, on the Coast of America, Near the Mouth of the Orinoco." This river is in Venezuela and empties into the Atlantic.
46. The Principal Game Birds of Canada and United States?
Equal, general over U. S. and southern Canada, breeds throughout its range; Prairie Hen (called also Prairie Chicken), ranges from Illinois west to the foothills of the Rockies; Wild Turkey, now found only in thickly wooded tracts of a few central western and southern states, resident throughout the year. Canada Goose, nests in northern part of U. S. and in Canada; winters mostly in southern states. Woodcock, ranges from Canada to the Gulf of Mexico, nesting nearly throughout its range, winters south of Virginia and southern Illinois. Ruffed Grouse, Canada and eastern U. S., and Minnesota south to northern Georgia. Wild quail and Arkansas. The Ducks with one or two exceptions, nest in Canada and northern U. S. and

Seeing the Car is Only Half the Story

ITS distinctive beauty and style may have thrilled you on sight, but that is only half the story. The Most Beautiful Chevrolet in Chevrolet History also offers a host of mechanical improvements and qualities of performance almost unbelievable in a car at so low a price.

Mark the greater comfort, convenience and safety of driving—the result of the new and larger steering wheel, more easily operated rear-shift lever and emergency brake, and many other readily apparent improvements.

And note that the Most Beautiful Chevrolet in Chevrolet History is selling at NEW, LOWER prices, the lowest for which Chevrolet has ever been sold in Canada.

QUALLY & YOKOM,

CLARESHOLM, ALTA.

SCHOOL OF AGRICULTURE

On Monday evening last the Kow College Koons presented their second annual minstrel show before a large and appreciative audience.

The Minstrel Troupe consisted of 25 members, including the seven piece orchestra. The first part of the program consisted of songs by Bunny Larsen, Mr. Benn, Mr. Mansfield, Mr. Howe and Mr. Cockburn. Jokes and gags were also used in this part with the result that the members of the front row are afraid to go down town unguarded.

The second part of the program consisted of a duet by Messrs. Gill and Hoare, a dance by Bill Ryan, a monologue by Mr. Howe, an impersonation of a "cultured" controls by Malinda, and an offering by Messrs. Cockburn, Elton and Howe proving that the theory that "there is a sucker born every minute" is still correct.

The last part consisted of a skit entitled "The Boosters Club of Blackville," in which some colored gentlemen get badly mixed up in a political campaign. After the show dancing was indulged in till 1:30 a.m.

We wish to take this opportunity of thanking those who so kindly helped in making the show a success.

"The Whole Town's Talking"

Great London Success Coming to Clareholm

Much interest is being manifested in town over the return visit to Clareholm of Miss Verna Felton and her clever company who a few months ago so delighted our theater goers with their presentation of "So this is London." This time they are coming with their latest success—"The Whole Town's Talking"—which is the reigning hit of the present London season, as it was also an instantaneous hit when presented in New York. The date here is Monday, March 7th, at the Rex theater.

It is a hilarious comedy from the pen of Anita Loos, author of that other amazing success, "Gentlemen Prefer Blondes." "The Whole Town's Talking" tells in a most ludicrous manner the story of a big business man whose daughter, imbued with romantic ideas, was not satisfied with the man her father looked upon as an ideal son-in-law to be. This young man, his secretary, and later his partner, was a plodding sort of fellow, but with such a good grasp of the business that his partner, Henry Simmons, thought it would be a good idea to have him in the family, so set

about in his own way to bring his daughter, Ethel, around to his way of thinking. As the young lady had expressed a preference for a "man of the world," one who knows his way about, and who has experienced "affairs of the heart," her father, by a clever ruse makes her believe that the quiet young man is not so slow as he looks, but on the contrary has had a very "hottish" affair with a Hollywood screen star named Lottie Lytle during a business trip he had taken to California. The daughter was delighted, and all was going well, when the lady of the screen came to town on a "personal appearance" tour accompanied by her director who was also her jealous fiancé. Her hearing of the alleged "affair" started after the "quiet" young man and in so doing starts all kinds of ludicrous situations which finish up with a great surprise, amidst a perfect cyclone of merriment. It is this the play to brighten up this hum-drum existence with a ray shaft of light and jollity, in the hands of Miss Felton and her associates, when they appear at the Rex.

Tuesday evenings, 8 o'clock, prayer meeting.

Friday evenings, at 8 o'clock, Bible study in charge of pastor.

Hearty welcome is extended to all who enjoy good music and God's Word.

Rev. Mrs. Bean, Pastor.

HERE AND THERE

Skating in the Laurentians is becoming ever-popular in Quebec. To cope with the greatly increased traffic of winter sports, between the Canadian Pacific Railway Company are operating special trains from the mountains during the week ends, from January 9 to March 15. Canadian winter sports are attracting a great number of Americans of all ages. This was evidenced by the number of visitors at the Chateau Frontenac at Quebec city, who came across the border during the Christmas and the New Year's season.

Beaver trapping will be permitted, under an order-in-council, issued, throughout the upper part of the province of Alberta, north of the 55th parallel. Within these bounds the close season, which now season for the whole province and for the whole year, will be opened for four months, January 1 to April 30.

The classic dog sled derby of the West is drawing near. On February 21, 22 and 23 some of the smartest famous husky teams in America will battle for supreme honors at Quebec city in the Eastern International Dog Sled Derby. The total distance of the race is 123 miles. Usually the dogs drag a heavy sled, which now consists of a sledging to the fact that the rules require that any dog unable to finish the race must be carried on the sled in the finishing post. The first prize is \$1000 cash. A grand music-queade will at the Chateau Frontenac, the general headquarters of winter sports season, will be the host of the Dog Derby.

Chinook Gossip

A large number of young folks spent last Friday night at the home of the Venns.

Joe Walshie went to Stately the week end.

A large number of young folks spent Thursday evening at the home of Ed. Derach.

Jack and Henry Kygg, formerly of Lethbridge, have rented a section of land from R. F. Henker recently bought by him from A. Elgin.

The result of the election for councillor division No. 1 last Saturday was 55 votes in favor of W. C. Sherman and 60 in favor of Otto Henker. The contestants put in a rather strenuous week of it at electioneering. Mr. Henker takes this means to thank his electors for their support.

Outposts Of The Empire

Dominion Has Some of Which Canadian Know Little

Canada has some outposts of her far-flung empire of which Canadians know very little, observes the Dominion Star, admitting at the same time that even large parts of its own province of Manitoba are to be unknown quantities. Doubtless that admission could be made by newspapers in every one of the nine provinces, and all may very well like to heart the counsel of the Sun that we should know Canada better. The Sun is also right when it goes on to say that isolated places have now means of knowing the larger centres better than those centres can know the more isolated areas. Thus, it continues, the work of providing means of communication and other amenities and necessities of civilization in the Maritimes and the Northwest Territories goes steadily forward. The administration of this area is carried on by the Northwest Territories and the three branches of the department of the Interior, and every year an officer is sent from Ottawa to visit conditions and to gain information as to local needs. This year John F. Moran, inspector of the branch, made his third trip, which extended to Akivik, in the mouth of the Mackenzie, and occupied four months.

The posts which show the greatest signs of growth are Akivik, Inuvik, and Tuktoyaktuk. Progress at these points has been assisted by the establishment in each of them of warehouses, which have been connected by ties in touch with the outside world. The chain of stations which includes Edmonton, Alberta, Inuvik, Tuktoyaktuk, and Akivik, in the Northwest Territories; and Mayo, Dawson and Herschel, in Yukon, has proved a great boon to all interests in the country.

At Akivik, the gathering place of Eskimos from a long strip of the Arctic coast, in early July were assembled between twenty-five and thirty small schooners, with auxiliary gasoline engines, all belonging to Eskimos. These schooners, ranging up to 45 feet in length, are built in Edmonton to the order of Eskimo hunters and are brought to Akivik by Mackenzie and delivered to the purchasers at Akivik. As soon as trading is over the Eskimos disperse, sailing in their schooners to their fishing, sealing and hunting locations along the coast, not to return to Akivik until the following winter. These boats are of course built, but they so facilitate hunting that they are considered profitable investments.

Surgeons Of East

Have Peculiar Method

Use Certain Kind of Ant to Close Wound After Operation

The Asclepiadis, or surgeon, of the East finds the secret of a certain ant of inestimable value. As soon as an operation is completed and it is desired to close the wound, the surgeon of the ant is requisitioned. Their part in the operation is the stitching of the wound caused by the knife.

With the aid of a delicate pair of pliers, the surgeon uses an ant by the neck. The operator closes the incision with the fingers of his left hand. The ant is then brought into contact with the wound.

In its eagerness to escape from the clutches of the pincers, the creature closes its jaws, biting through the skin and joining the two edges together.

Its mission on earth is now over. For its services the creature is now rewarded with decapitation, the head chopped over the incision.

This procedure is repeated with other ants until the whole length of the wound is completely closed.

The method is said to be much more satisfactory than either thread or silver wire, and the part is also believed to heal more speedily by the method of treatment than by any other.

Says Women Travel Light

A red top pattern on the Great Station, New York, is quoted by the New York Times as follows: "Women are not as generous as men in luggage, but neither do they give up as heavy loads to carry. Times have changed, but ten years ago the heaviest bags belonged to the women of today."

Now to men. Women these days travel light.

Would Experiment With Plants

Sir Jagadis Chandra Bose, the eminent Hindu scientist, is convinced that plants are as near animals in their emotional activities as they can be, and he has been experimenting with them.

In all sorts of biological experiments, thereby recording any changes for the practice of vivisection in any form.

W. N. 1, 1907

Hog Grading and Culling

Bacon Hog the Most Profitable Type to Raise

Hog grading is receiving less and less opposition as its value becomes better understood. The Dominion Live Stock Commissioner reports that many drivers who were at first opposed to hog grading have fallen into the new craze. Some of the purchases on a grading scale. Demonstrations in grading, the Commissioner also reports, have been the means of convincing many farmers of the suitability of the bacon hog for both the Canadian and export trade. The Commissioner also asked for assistance in the culling of the new stock and in numerous instances culling work has been followed by community organization for the purchase of fifteen to twenty-five sows of good bacon type. There are, however, still a good many who are reluctant to be convinced that the bacon hog is the most desirable and most profitable type to raise.

Water Feed For Poultry

Poultry Feed Used at Lethbridge Experiment Station Is Found Satisfactory

The winter feed for poultry at the Lethbridge, Alberta, experimental farm that was found satisfactory consists of equal parts wheat, crushed oats and cracked corn for a scratch feed, and a dry mash of equal parts bran, short middlings or low grade flour, corn meal, beet meal, one half part ground oats and a little less salt and cabbage is given to the scratch feed is thrown in the litter each morning to induce exercise and a liberal feed is given at night before the birds go to roost. The dry mash is kept before the birds on open hoppers at all times and a wet mash is fed at noon on each alternate day. No more of the wet mash is fed than is eagerly consumed in five minutes.

Green feed in the form of alfalfa leaves and cabbage is given to the birds in liberal amounts and roots are provided as additional succulence.

Have Natural Hothouse

English Gardeners Grow Vegetables Outdoors in Dead of Winter

An underground cold fire at Redhill, England, enables gardeners to grow plants outdoors in the dead of winter. The results, it is asserted, are better than if plants were grown in a hothouse. Vegetables twice the size of others grown in the hothouse are produced by reason of this underground furnace, which has been kept in worked-out galleries of coal mines. The fire presents little danger to local property, since it is confined to a definite area.

More Settlers From Britain

Prospect of British emigration to Canada during 1927 are good, the new announcement of 14,000 men having been received with favor, reports Frank Chamberlain, secretary of the British Warlike and Voluntary League who has returned to Toronto from England.

More Civilized Than Bears

After a winter of ten years, Martinus Maternien, has come out with a new monumental work on the "Life of the Ant." He shows in it that these insects have a more civilized mode of living and are far more civilized than the bears, of which he wrote formerly with so much simplicity and beauty.

So far as British fashion are concerned, girls will be girls again. The advance spring styles show a definite reaction against the masculine modes.

W. N. 1, 1907

Public Health Campaign

Rural Organizations Throughout the West are Interested in This Matter

The United Farmers of Manitoba are the latest agricultural group to show a very active interest in the matter of public health, a subject in which rural organizations, particularly throughout the west, are now adding to the topics which they regularly consider of major importance. The interest expressed by one speaker, that, in the past, more attention had often been given to the well-being of livestock than of the humans who looked after them, seemed to be one that was rather generally shared, and concerning which, the farmer most distinctly proposed to do something definite.

Judging from a general survey of the suggested programs of a number of organizations, efforts toward the immediate future will be directed toward a campaign of education and instruction rather than attempts to legislate any specific disease or lend direct aid to such an undertaking. It is felt that ignorance ranks high among the causes of disease, and health conditions and that the first and most immediate need is to attack the problem from this angle.

Chinese Symbolic Money

Made for Use of Departed Spirits and of Profitable Industry

"Money" and other articles made out of tin foil, and intended for the use of the departed spirits, are sold in the town of Shanghai, China, with a curious and profitable industry. The production of these symbols for the use of the departed spirits is said to bring in \$15,000,000.

The symbolic money is made by hand, the best being hand made on a small machine. It is made in the shape of a coin, and is intended for the use of the departed spirits. The money is placed in the tomb where the dead is buried, and is used to make more "money."

Should Eat Alfalfa

American Dental Association Recommends This Fodder for Breakfast

Human beings should display horse sense and eat horse food—alfalfa. This was the opinion expressed by many of the hundreds of dentists from all over the country attending the meetings here of the American Dental Association and the American Association of Dental Schools at Chicago. Dr. Sherman L. Lewis, professor of dentistry at Indiana University, said alfalfa is the richest of all leafy-top vegetables in vitamins and iron, which are important both for the teeth and general health. Other dentists admitted the possibilities of alfalfa as a food, and said that it was called "horse radish" in England.

Bears Kill Sheep

Bears are on the rampage in the counties of Compton and Frontenac, in the province of Quebec. They have, according to reports received from farmers, killed no less than one thousand sheep during the last few months. A bounty of fifteen dollars is offered to anyone who kills a bear.

The provincial government for all bears killed, and permission to kill the animals throughout the year has been given.

The worst man is sometimes capable of giving the best advice.

Editor: "That story is good deep." Writer: "Yes, yes." Editor: "Yes, it put me to sleep."

Some society snobs doubtless pity Adam because he had no ancestors.

Restoring Churches in France

Surprising Degree of Success Attained by Architects

Years of hard work on the part of architects and ingenious cooperative financial arrangements carried out by churches, has made it possible to reconstruct with a surprising degree of success many of the French churches which were damaged by shell fire during the war. Some will never be restored, because in some cases they were completely destroyed.

The restoration of these various edifices, of course, is the Rhetoric Cathedral, toward the reconstruction of which John D. Rockefeller Jr. has given \$1,000,000. This cathedral, which has gone down satisfactorily, the result being better than some that have been destroyed. The chief architect of the Bureau of Historic Monuments, who was chosen to superintend the project, knew the pre-war cathedral intimately and set about restoring its stone floors of flags, slabs and virgins. The roof has been rebuilt, the great nave restored, a part of the old glass replaced. The smiling figure of the angel on the north doorway was rebuilt from a copy in the Trocadero Museum—home of so many copies.

Canadians Are Jailed

United States Immigration Officers Arrest Canadians for Staying Too Long in the Country

Some of Canadian citizens are languishing in jails of North Dakota and Minnesota and dozens of warrants have been issued by United States immigration officers for Canadian residents who stayed south of the boundary instead of reporting at the border when their time limit expired. A. Burnmaster, chief inspector of the Winnipeg branch of the United States immigration service, states:

"The United States immigration service is tightening up on delinquent immigrants and border runners and is making it impossible for the latter to stay in the country without being caught and given hearing by court judges when their time limit expires. If a temporary visitor has stayed longer in the United States than the time allotted him, he is arrested when caught and given hearing by court judges when their time limit expires. If a temporary visitor has stayed longer in the United States than the time allotted him, he is arrested when caught and given hearing by court judges when their time limit expires. If a temporary visitor has stayed longer in the United States than the time allotted him, he is arrested when caught and given hearing by court judges when their time limit expires."

Berlin Pedestrians Organize

Walkers insist on Being Organized Equal Street Rights

Berlin pedestrians have organized an association for self-protection against dangers of being injured or killed by various kinds of transportation.

The traffic department at Police headquarters will first be approached with a view to getting equal rights with vehicles on the streets. More first-aid stations will be asked for, as well as some form of damages for injuries, payable through taxes levied on the owners of automobiles, street cars and other vehicles.

The association hopes to bring about a coalition in Berlin whereby the walker will have an even chance of crossing the street without accident, the organizers declare.

Manitoba Paper Mill

The Manitoba Paper Company's 125-ton pulp and paper mill, 50 miles north of Winnipeg, and the first pulp and paper mill in the Prairie Provinces, has been opened. A modern town of 1,000 people is springing up on the site.

It is far easier to teach a parrot to talk than it is to teach the average woman to hold her tongue.

About the best the man can do who tries to drown his sorrows is to make his head swim.

Developing Cattle To Withstand Arctic Cold

Cross of Yak of Asia and Hardy Galloway Is Being Tried

The Dominion government is co-operating with the United States authorities in the development of a species of cattle that will withstand the rigor of the Arctic winter.

Beef and dairy breeds suitable for the climate of Alaska and the vast tundras of northern Canada are now being tested at several experimental farms in the far north. The most hardy breed tested, the Galloway, is being crossed with the shaggy yak of Asia, to produce a desirable cattle for northern climates. The cattle-yak crosses obtained by these crosses are too young as yet to determine just how far they will meet the requirements, but results are said to be promising.

In order to develop a sturdy dairy breed for the north country, the Galloway, which is strictly a beef breed, was crossed with the Holstein-Friesian, the crosses being made both ways. The crossbreeds are hardier than the Galloway, but lack the heavy coat of the famous beef cow. Only a few of these crosses have come to the milking stage so far. They are not heavy milkers, but their output is said to compare favorably with the average family cow. It is hoped that some of the second, third and succeeding generations will show milking qualities. The crossbreeds are hardier than the Galloway, whereas the pure bred Holsteins do not range in stormy weather, but gradually work their way to shelter.

Finds Air Travel Tiresome

Sir Samuel Moore Rides Motorcycle by Reading

On her air trip to India Lady Maude Moore travelled much lighter than the motorcyclist, her sister, the Hon. Mrs. John Gilmour, on her journey to the East. Lady Maude travelled with no suitcase, but had special facilities in aluminum made for her dressing case. To her amusement, mingled with regret, she had to turn down offers from various friends who were anxious to travel with her in the capacity of maid. They would not have made the offer if they had known as much about air travel as Sir Samuel Moore does. His idea is to make a book, it is said.

Twenty Miles Too Speedy

Stephenson's Idea for First Train Was Considered Unreasonable

Just a century ago, when George Stephenson was discussing with counsel for the Liverpool and Manchester Railway Bill the question of speed, it was mentioned that he had every hope of driving his locomotive at 20 miles an hour.

William Brougham turned upon Stephenson angrily and told him that if he did not moderate his views and bring his engine within reasonable speed he would inevitably make the whole thing, and he himself be regarded as a lunatic fit only for Bedlam.

Mr. Plunket, the goldsmith gave Alice a bowl of goldfish for Christmas. Next day they were found dead.

"Ty, wa's the matter?" asked Mr. Plunket: "Vot have you done, Alice?"

"Nottin', fadder," said Alice. "I just gave 'em the add test to see if they were real."

It often happens that when a man tries to drive he tries to save it by seeking advice.

Buffalo Thriving in North

Animals Adapted Themselves Quickly to New Range

Reports from the superintendent of Wood Buffalo Park, near Fort Smith, indicate that the 1,600 buffaloes taken north in 1925 had settled down and were thriving, and that the 2,000 added in the summer of 1926 had already made themselves at home. As this year, which has been the hottest, the wild wood buffalo for many years, was selected by the buffaloes themselves out of all the surrounding country. It is evidently a natural buffalo range, which accounts for the quickness with which the buffaloes from Watrous adapted themselves to their new surroundings.

Good Word For Garnet Wheat

Has Pushed Wheat Growing Districts 100 Miles Further North

Garnet wheat is making good every claim advanced by the experts of the Federal Department of Agriculture. Hon. W. R. Motherwell, Minister of Agriculture, announced that reports from scores of farmers who grew garnet last year are unanimous in the one vital claim on behalf of the wheat—that it ripens ten days earlier than the best wheat also here has been highly satisfactory.

Along the northern edge of the agricultural belt in the three prairie provinces, where the frost comes so great as to make wheat-growing very unattractive, garnet wheat has come through splendidly. Last year, while other varieties of grain were nipped and rendered unmarketable except for chicken feed, garnet is a good example of the better adapted wheat.

Extraordinary yields are reported from many points. T. Blain of Herby, Sask., reports a yield of 40 bushels per acre, while a yield of 30 bushels per acre was reported from the same place. The yield of 30 bushels per acre was reported from the same place. The yield of 30 bushels per acre was reported from the same place.

Mr. Motherwell declared that there could no longer be a doubt as to the benefit of garnet. It has rolled back the northern boundary of agriculture in Canada from 100 to 125 miles, bringing all the meadow and large country from Port Arthur to Churchill to the Indian Territory within the domain of the plow.

The one defect of the grain, said Mr. Motherwell, was that it had a slight tilt in the coloring. However, the millers always bleached the flour before milling, so that this was not a serious defect.

World's Largest Butter Tins

Canadians Consume More Butter Than Any Other Country

Canadians eat more butter than the people of any other country in the world, per capita consumption. In Canada has been computed at 27 pounds. In the United States it is 17 pounds.

While the butter produced in Canada is the largest producers of butter in Canada, the output of the three prairie provinces is about one-third of the production for all the Dominion. At present Western Canada produces more of the butter exported from Canada. Last year the shipments from the prairie provinces amounted to about 1,500,000 pounds.

The growth of the dairies of dairying in Western Canada in recent years has been phenomenal. In 1900 the total output of butter in Manitoba, Saskatchewan and Alberta was less than 2,000,000 pounds. Last year it was over 50,000,000 pounds. By 1920 it is estimated that the production will reach 100,000,000 pounds.

Farmers on the Canadian prairie have realized that wheat farming alone is not enough to make a living (farming and endure the treacherous work of George W. Plunket, M.P., for many years, which has been the hottest, the wild wood buffalo for many years, was selected by the buffaloes themselves out of all the surrounding country. It is evidently a natural buffalo range, which accounts for the quickness with which the buffaloes from Watrous adapted themselves to their new surroundings.

B.C. Apples Go to Britain

The Associated Growers of British Columbia marketed 700 cars of apples in Great Britain. In the season just passed, as compared with 400 cars a year ago. Close investigation of the market in Great Britain has recently been made by the president of the association who advocates the marketing of every apple in the season due to the inadequacy of cold storage conditions at the ports of arrival.

FEBRUARY SCHOOL REPORT

Primary

Grade 2—John Lamin, Rose Kollman, Deline Oviatt, Jack Hutchison, Mary Ross, Allie Rompman, Dorothy Powers, Dolly Smedstad, Genevieve Power, Lesley Holmes, Berley Oviatt, Mack Diebold, Norman Dow, Ruth Haslam, Harold Paulson, Clarence Thompson, Absent—Mildred Kests, Alvin Fenton.

Gr. Grade 1—Margaret Hoffman, Norma Callahan, DeLyle Whitehead, Jack Murray, Irene Carey, Helen Bowie, Frank Mogensen, Arthur Hetherington, Alvin Andrews, George Wong, Marion McEwen, Holly Clark, Edgno Moffatt, Allan Barclay, Ralf Berg, Beatrice Lewis, Margaret Johnson, Edward Benson, Dorothy Carney, Mary Hean, Jack Chilton, Charles Harvey, Edna Smedstad, Hazel Wall, Margaret Teters, Evelyn Hagerman, Absent—Dorothy Dickson.

Gr. Grade 1—Verna McAlister, Mabel Dahl, Pauline Hagerty, Mildred Thompson, Gladys Wall, Dorothy Quilty, Betty Mulligan, Oliver Bergerson, John Patterson, Dora Hildson, Benson Curtis, Rose Dow, Joyce Arnestad, Kathleen Anderson, Gordon Foxcroft, Jack Walters, Beryl Barclay, May Ross, Leone Teters, Kenneth Hage, Absent—Freda Anderson.

Grade II

Eather Smedstad 92.66, Drayson Foxcroft 87.50, Evelyn Carey 86.50, Betty Quilty, 84.33, Miriam Amundson 82.66, Shirley Ramberg 82.33, Gordon Gray 81.16, Adolphe Wallebeck 80.50, Donald Arnestad 1983, Pat Murray 78.66, Lester Torback 78.33, Jean Hagerty 77.50, Emma Nelson 77.33, Ethel Wall 77.33, Jack Kests 74.66, Edlen Douglas 70.16, Helen Walters 66.85, Kathleen Rose, 66.66, Ivy Sinclair, 64.83, Hugh Patterson 63.51, Maimie Wong 63.51, Clarence McAlister 63.51.

Grade III

Gale Laurie 86, John Douglas 84.4, Donald McDonald 84.2, David McEwen 81.20, Jack Diebold 29.6, Eric Amundson 78, Willie Hoffman 77.20, Harold Wallebeck 74.81, Gladys Hage 74, Joe Kollman 73.80, Irene Bowie 73.00, Margaret Ross 72.20, Mickey Chilton 72.2, Ralph Knudson 71, Johnnie Smedstad 70, Lily Holten 69.80, Ronit Knudson 69.80, Arnold Berg 65.20, Virginia Thompson 65, Dorothy Dahl 61, Lawrence Catter 52.

Grade IV

Bety Hughes 95, Andrew Laurie 95, Gordon Teters 87, Wayne

Qually 87, Billy Anderson 86, Roanna Bean 86, Martin Benson 85, Cecil Andrews 84, Beatrice Kest 82, Grace Harriman 82, Alfred Harley 81, Edward Nelson 80, Johnnie Hutchinson 80, Ellen Carey 79, Clara Bergerson 78, Jean Chilton 75, Ben Benson 74, Lily Wong 74, Lily Thompson 72, Johnnie Birch 72, Evelyn Bowie 72, Nora Cleeman 71, Dorothy Hagerman 71, Rita Bell 70, Arthur Dahl 69, Stella Carroll 68, Mabel Paulson 62, Laurene Catter 58, Annie Harvey 58, Bertie Hildson 58, Otto Hoffman 57, Jimmie Hutchinson 56, Edwin Berger 51, Willie Rudolph 46, Ruth Atkinson 46, Lois Gais 46, David Wong 42, Beatrice Booth 39, Lucille McAlister 37.

Grade V

Margaret Rennie 91, Edna Andrews 91, Lily Wong 89, Janet Brooks 86, James Kenne 81, Anna Birch 81, Verna Carroll 79, Ronald Thorne 79, Margaret Reynolds 79, Minnie Rudolph 77, Clive Smith 77, Margaret Grier 76, Mabel Lamin 74, Jean Morrison 74, Mildred Smith 73, Edlen Vaughan 71, Eva Atkinson 70, Bertie Arnestad 70, Nelson Atkinson 69, Clara Mogensen 68, Marjorie Thomas 68, Luella Oviatt 67, Freyette Thompson 67, Robert Cheesman 66, Martha Dahl 65, Ruby Powers 65, Rita Moore 64, Gladys Thomas 62, Myrtle Hage 57, Hazel Hage 46.

Following were absent during examinations: Rose Willitte, Mary Bernad, Billy Godfrey.

Grade VI

Joe Vellebeck, Roy Porter, Helen Hagerty, Reggie Wall, Brenda Vaughan, Ruby Lewis, George Mackay, Marion Mack, Gladys Quilty, Esther Dahl, Tommy Grier, Mary Patterson, Margaret Hagerty, Mattie Oviatt, Lillian Oviatt, Frank Palmer, Maxine Quilty, John Mullin, Gladys Sturgeon, Alberta McAlister, Helen Teters, Owen Smith, Aubrey Barr, Edna Schultz, Buddy Butts, Eric Vaughan, Alan Strange.

Grade VII

Verna Thompson 82, Clem King 73, Borghild Wallebeck 72, Anna Bell 70, Winnie Cleeman 70, Harold Bergerson 68, Basil Romain 67, Clarence Hagerman 66, Andrew Johnson 59, Andrew Thorne 58, Eldred Palmer 58, Seth Smedstad 57, Francis Ross 56, Herman Rompman 56, Edith Nelson 55, Ruby Smedstad 55, George Braten 51, Verna Anderson 51, Roland Ross 50, Fred Hagerman 49, Patricia Power 48, Lily Hoffman 46, Jenny Karback 45, John Lomheim 44, Rita Thomas 43, Florence Arnestad 42, Myrtle Smith 41.4.

Not Ranked—Edgar Howard.

Grade VIII

(Examined in nine subjects)
Flora Staal 91, Anna Wallebeck 87.6, Leo Mogensen 84.1, Norma Sturgeon 80.6, Margaret Stevenson 79.7, Jack Mackay 79.7, Eleanor Arnestad 78.7, Harold Atkinson 78.2, Lily Boniface 75.8, Mildred Laidlaw 74.4, Madeline McMillan 72.8, Edith Symmonds 72.4, Gordon Ferguson 72.3, Muriel Gordanier 72.1, Hazel Whitehead 70.8, Dorothy Anderson 69.4, Edith Staal 69.3, Owen Anderson 67.7, Laura Harrison 67.6, Stella Thomas 65.7, James Smith 65.7, Barbara Watson 65.1, Arthur Knudson 63.4, Jennie Lamb 61.6, Forest Fenton 61.6, Frank Kollman 60.7, Tommy Guy 56, Jack Allen 49.8.

"The Whole Town's Talking"

Connected with Latest London Society Sensation

The latest sensation in "Dear old London" is one of interest to local theatre goers, as it is directly connected with the hilarious comedy "The Whole Town's Talking," with which Verna Fenton is coming to the Rex theatre next Monday, the 7th.

Under date line of Feb. 22 the newspapers of this country carry the information that London society was all agog over the announcement that Lord Ashley the young heir of the Earl of Shaftesbury had succumbed to the charms of the well known theatrical star Miss Sylvia Hawkes, who has been appearing in the reigning success of the present London season—"The Whole Town's Talking." Although promptly denied by the Earl, the wedding actually took place a few days afterwards, and the beautiful bride of this proud son of nobility, now so prominent in London's theatrical circles, will one day be mistress when her husband succeeds to the title, which has been in existence since the 16th 1600s.

Romantic—eh what? But no more so than the daughter of Henry Simmons—Ethel by name—who told her father that the steadily good business man, but quiet and retiring that he favored as her future husband, was not her ideal, but that on the contrary, she preferred a "man with a past"—one who had had "affairs of the heart" and who, for that very reason appealed to her as no modest, "now going youth, though ever so desirable in other ways, could deliver do. And right then, when Ethel started something, as through her father's well intentioned efforts to meet her wishes and at the same time carry his own plans, the peace and sanity of the entire family swayed in the balance throughout a hectic period of complications, near murder, and surprises which during the action of this hilarious comedy carried an audience merging out of laughter into another.

A short but jolly season of merriment is again on the cards for the Kestels here Miss Verna Fenton and her clever company appear on this their return engagement.
